

Terms of Reference (TOR)

Project Title: CDC Website Enhancement

Approved Budget for the Contract (ABC): Php 2,000,000.00

Mode of Award: MARB

I. Project Background

The Clark Development Corporation (CDC) website is envisioned to serve as a comprehensive digital hub that goes beyond traditional marketing and tourism purposes. It will integrate business, tourism, governance, and stakeholder engagement functions, ensuring transparency, accessibility, and modern user experience.

The website will also function as a central hub for CDC's broader initiatives and responsibilities, including:

1. **Business Opportunities:** Presenting investment prospects, information on how businesses can establish and expand their operations, access incentives, and benefit from the economic advantages offered by Clark Development Corporation (CDC). It includes resources for potential investors, winning bidders, and winning bidders interested in participating in CDC's procurement activities, including small value procurement.
2. **Tourism Initiatives:** This section showcases CDC's efforts to develop world-class tourist attractions, events, and recreational facilities that enhance visitor experiences. It also provides information for tourists, local communities, and stakeholders on activities, events, and partnerships aimed at boosting Clark's tourism industry and supporting sustainable development.
3. **Announcements, including Issuances and Memo Circulars**
4. **Corporate Social Responsibility (CSR) Projects:** Highlighting CDC's outreach programs, environmental efforts, and socio-economic development initiatives to foster community engagement.
5. **Gender and Development (GAD) Projects:** Showcasing CDC's commitment to gender inclusivity, equality, and empowerment.
6. **Job Seeker Resources:** Provides updated job openings, career opportunities, and application guidelines to attract qualified talents.
7. **Compliance with Governance Standards:** Displaying CDC's adherence to government-mandated transparency requirements, including disclosures related to the Governance Commission for GOCCs (GCG) and other good governance practices. This ensures

kr

stakeholders are informed about CDC's activities, financial performance, and strategic plans.

There are two sections in the website for this purpose:

- Transparency Seal
 - Corporate Governance Scorecard
8. Bidding Invitations and Procurement Opportunities: These are disclosures related to procurement opportunities, including those under small value procurement, which cover the following:
- Bidding Invitations: Public announcements inviting eligible winning bidders and winning bidders to participate in the bidding process.
 - Bidding Documents: Detailed materials outlining project requirements, technical specifications, and evaluation criteria.
 - Notice of Award (NOA): The formal communication to the winning bidder, confirming their selection for the contract.
 - Notice to Proceed (NTP): The official directive to the awarded winning bidder to commence the project or service as specified in the contract.

II. Objectives:

To have an updated website with a Content Management System (CMS) designed to support multiple users with designated roles, such as Content Creators, Content Moderators/Approvers, and Super Admin.

The UI/UX should be modern, sleek and enable proper display of CDC's compliances.

III. Scope of Work:

1. Content Audit, Synthesis, and Information Architecture Redesign

The winning bidder shall conduct a comprehensive content audit of the existing CDC website (www.clark.com.ph), including all sections such as Transparency Seal, Corporate Governance Scorecard, Bids & Notices, Memo Circulars, Business, Tourism, and other governance and operational disclosures.

The proponent shall:

- Analyze, rationalize, and consolidate existing content to eliminate redundancy, outdated materials, and fragmented information;
- Synthesize and reorganize content into a clear, logical, and user-centered information architecture;
- Design an intuitive navigation structure that allows users to easily locate information within three (3) clicks or less whenever possible;
- Develop a simplified menu hierarchy with clear labeling, plain language terminology, and structured categorization of governance, business, tourism, and compliance disclosures;

- Ensure that Transparency Seal and Corporate Governance Scorecard documents are properly structured, searchable, and organized according to regulatory categories (ARTA, COA, GCG, ISO, FOI, SALN, Procurement);
- Propose a content taxonomy and tagging structure to enable efficient filtering, searching, and cross-referencing of related documents;
- Recommend content presentation formats (e.g., dashboards, collapsible sections, document libraries, categorized repositories) to enhance clarity and accessibility.

2. Newsletter Management Module

The winning bidder shall develop and configure a fully integrated Newsletter Management Module within the CMS to support stakeholder engagement and digital communication. The module shall include:

- Online subscription form accessible from:
 - Homepage
 - News & Events section
 - Website footer
- Secure subscriber database with:
 - Double opt-in email verification
 - Consent capture compliant with the Data Privacy Act of 2012
- Manual and scheduled email distribution capability
- Automated confirmation and unsubscribe mechanism
- Newsletter archive page accessible on the website
- Exportable subscriber database in CSV format
- Administrative dashboard for monitoring subscriber growth and email dispatch history

The system shall ensure compliance with applicable data protection regulations and prevent unauthorized use of subscriber information.

3. The winning bidder shall submit at least two (2) website design concepts for CDC's approval before front-end development begins.
4. Develop a fully functional, user-friendly Content Management System (CMS) with the following user roles:

Content Creator	Responsible for drafting and submitting content for specific sections of the website. Content creators can upload, edit, and revise articles, images, videos, and other materials assigned to them but cannot publish directly. Their submissions will undergo moderation before becoming publicly visible.
Content Moderator	Moderators are assigned to specific sections of the website. They have the authority to review, approve, request revisions, or reject content submissions within their assigned section only. They cannot publish or modify content in other sections or sitewide. Moderators ensure that content meets quality, branding, and compliance standards before approving it for publication.

Super Admin	Super Admins have full access and control over the entire website. They can manage all users, assign roles, oversee all content across sections, configure site-wide settings, and perform critical administrative tasks such as backups, security management, and full publishing rights. Super Admins can override approvals and make executive content decisions as necessary.
-------------	---

5. Ensure content migration from the existing website (www.clark.com.ph) with data accuracy.
6. Implement security measures following current industry best practices.
7. Conduct system testing (User Acceptance Testing, security checks, performance tests).
8. Deploy the system to CDC's infrastructure with source code turnover.
9. Provide 1-year support and maintenance, including bug fixes and updates.
10. Conduct user training and provide documentation for system use and administration.
11. Compliance with Government Website Standards

The proposed website shall comply with all applicable Philippine government standards, policies, and regulatory requirements governing official government and GOCC websites, including but not limited to:

- Governance Commission for GOCCs (GCG) disclosure requirements
- Anti-Red Tape Authority (ARTA) transparency and Citizen's Charter guidelines
- Commission on Audit (COA) public disclosure requirements
- Freedom of Information (FOI) compliance standards
- Data Privacy Act of 2012 (RA 10173) and National Privacy Commission issuances
- DICT-issued policies and standards for government websites
- Accessibility standards for persons with disabilities (WCAG 2.1 Level AA or latest applicable standard)

The supplier shall ensure that the website structure, document repositories, transparency sections, and public disclosures are organized in accordance with regulatory categories and are easily searchable, accessible, and downloadable.

The system shall also ensure:

- Proper document labeling and metadata tagging
- Mobile responsiveness
- Accessibility compliance
- Clear date stamping and archival structure
- Persistent public access to governance disclosures

IV. Technology Stack

The proposed system shall be developed using PHP (latest stable version) and MySQL to ensure compatibility with CDC's existing server infrastructure and internal technical support capabilities.

V. Deliverables

1. Fully Functional Website with the Following Features:

a. User Authentication & Access Control

- Multi-Factor Authentication (MFA) support via email, SMS, or authenticator app.
- Role-based access control (RBAC) ensuring users only access permitted functions.
- Password reset and recovery features.

b. Content Management

- WYSIWYG (What You See Is What You Get) Editor for easy content creation.
- Content revision tracking with version control.
- Draft submission and scheduled publishing options.
- Media library with image/video/document uploading and tagging.
- Defined content submission, review, and approval process.
- Automatic notification system for pending approvals or content feedback.
- Multiple user levels:

Content Creators	Can create, edit, and submit content for review. Limited access to content management features relevant to assigned sections. Cannot publish content directly; requires approval.
Content Moderators	Can review, approve, or reject content submitted by Content Creators. Has permission to edit and enhance content before publishing. Can assign content back to creators for revision.
Super Admin	Full administrative control over system configurations, content approval, and user management. Ability to assign or modify roles and permissions. Access to system-wide settings, including security protocols.

c. Search, filter, and categorization of content entries.

d. Dashboard & Reporting

- Reports and visual analytics for web traffic, content engagement, and user activities.
- Exportable reports for internal review.

e. Interoperability

1. The supplier shall configure and test integration with CDC's existing portals for:

- Job posting integration with the CDC Human Resource Information System (HRIS) for internal CDC vacancies;

- Structured linking of the Clark Jobs Portal for job postings within the Clark Freeport Zone.
2. Open API structure to allow integration with third-party services such as:
- Social media platforms
 - Government portals
 - Payment gateways (when applicable)

f. Newsletter Management Module

The website shall include an integrated newsletter management module as defined under Section III (Scope of Work)

g. Government Website Compliance

The fully functional website shall:

- Meet government transparency and disclosure standards for GOCCs
 - Provide structured sections for:
 - Transparency Seal
 - Corporate Governance Scorecard
 - FOI
 - Citizen's Charter
 - Procurement Transparency
 - Data Privacy Notice
 - Ensure documents are accessible in searchable formats (PDF with selectable text)
 - Maintain structured archives of past disclosures
 - Support accessibility compliance
 - Be compatible with DICT security and hosting standards
- 3. Migration of existing content from www.clark.com.ph, ensuring accuracy and retention of structure.**
- 4. Website Design and Optimization**
- a. Modern, sleek, and highly navigable interface with a responsive layout adaptable to desktops, tablets, and mobile devices.
 - b. Intuitive navigation for easy access to content, services, and resources.
 - c. A powerful search feature allowing users to quickly find information.
 - d. Visually cohesive with CDC's branding
 - e. Optimized page load speeds to ensure fast access.

5. Cybersecurity and Data Protection Requirements

- a. User Authentication and Access Security

ky

- Secure user authentication using unique user credentials
- Password policies enforcing:
 - Minimum password complexity
 - Password expiration and reuse rules
- Automatic account lockout after configurable failed login attempts
- Session timeout for inactive users
- Administrative ability to activate, deactivate, or revoke user access

b. Authorization and Access Control

- Role-based access control (RBAC) to limit system functions and data visibility
- Restriction of access to confidential and sensitive records based on user role and office
- Prevention of unauthorized viewing, downloading, printing, or modification of records

c. Audit Trails and Activity Logging

- Automatic logging of:
 - User logins and logouts
 - Document access and downloads
 - Document creation, modification, referral, and deletion
 - Administrative actions
- Audit logs shall be:
 - Tamper-resistant
 - Viewable only by authorized administrators
 - Retained based on CDC policy
 - Compliant with standard best practices

d. Data Protection

- Encryption of sensitive data at rest and in transit within CDC's network
- Secure storage of documents and metadata
- Protection against unauthorized data extraction or data leakage

e. System Security Controls

Protection against common cybersecurity threats such as:

- Unauthorized access
- Malware
- Data tampering
- Ability to integrate with CDC's existing security controls (firewall, access policies, etc.)
- Compliance with applicable government IT security standards

6. Warranty

- a. The supplier shall provide user support and maintenance services during the warranty period covering one (1) year commencing from the signing of the user acceptance form.
- b. User support shall be available during the official working hours of CDC (Monday to Friday, 8:00 am to 5:00 pm)
- c. User support should cover the following:
 - User assistance
 - Troubleshooting
 - System issue resolution
 - Minor revisions

VI. Delivery Period

The Supplier shall complete the development, testing, deployment, and turnover of the CDC Website Enhancement Project within four (4) months from the issuance of the Notice to Proceed (NTP).

The four (4)-month period shall include:

- Content audit and information architecture redesign
- UI/UX design approval
- CMS development and configuration
- System integration and testing
- Content migration
- Deployment to CDC Data Center
- User Acceptance Testing (UAT)
- Knowledge transfer and documentation turnover

Failure to complete the project within the prescribed period shall be subject to applicable liquidated damages in accordance with government procurement rules.

VII. Hosting and Deployment

The website shall be hosted exclusively at the CDC Data Center.

The Supplier shall:

- Coordinate deployment with CDC's IT Department
- Conduct on-site system installation at CDC Data Center
- Ensure compatibility and operability within CDC server infrastructure
- Provide complete documentation, including:
 - System architecture
 - User manuals
 - Administrator manuals
 - Backup and recovery procedures

VIII. Knowledge Transfer:

The supplier shall conduct comprehensive system orientation and knowledge transfer sessions for CDC personnel.

IX. Confidentiality, Ownership and Intellectual Property

- a. All project-related information, including user data, system design, source codes, and configurations, is confidential and shall not be disclosed to third parties
- b. As a prerequisite to contract execution, the Winning Supplier shall submit a Notarized Non-Disclosure Agreement (NDA) to CDC.
- c. Upon turnover and acceptance, the system shall become the exclusive property of Clark Development Corporation
- d. The system or any part thereof shall not be reused, replicated, or deployed without CDC's prior written consent
- e. All administrative access and credentials shall be turned over to CDC upon project completion

Clark Development Corporation 

Annex A:

Annex A:

WEBSITE CONTENT PLAN

Main Menu / Section	Brief Description / Purpose	Key Content / Sub-Pages	OPR
1. Homepage	Landing page featuring highlights, announcements, featured services, quick links, and navigation access to all major sections. Serves as primary access point and information gateway for stakeholders	• Hero Banner (Investment message + CTA) • Quick Links (Priority Sectors, Incentives, Register / Invest, Investor Portal)	Comm Div / BDBEG
2. About Us	Establishes corporate identity, governance structure, and accountability framework. Provides legal mandate and institutional authority reference.	• Legal Mandate / Charter • Mission, Vision, Core Values • Organizational Structure (downloadable organizational chart) • Leadership (Board & Key Officers)	Comm Div
3. Why Invest	Supports investors, locators, and business stakeholders.	• Economic Overview (Growth, Workforce, Export statistics) • Locators by Nationality (% only) • Strategic Location and Other Advantages of Clark • Infrastructure and Utilities • Success Stories	BDBEG
4. Investment Opportunities		• Priority Investment Areas (SIPP) • Investment Briefs	BDBEG

5. Incentives and Policies		• Fiscal and Non-Fiscal Incentives • Registration Requirements • Sustainability Policies	BDBEG
6. How to Register / Invest		• Step-by-Step Registration Process • Requirements Checklist • Fees and Timelines • Permits and Clearances Guide • Business One Stop Shop • Citizen's Charter	BDBEG
7. Tourism	Tourism information, destination highlights, visitor-related content within Clark Freeport Zone.	• Tourism Overview • Hotels and Facilities • MICE Capabilities • Events Calendar • Tourism Investment Opportunities	TPD / CD
8. News and Events	Ensures regulatory transparency and dissemination of information and official policies.	• Press Releases • Announcements / Advisories / Memo Circulars • Investment Forums and Roadshows • Photo / Video Gallery • Speeches / Statements • Clark Monitor	CD
9. Download Center	A single platform where locators / stakeholders can download CDC's forms for ease in doing business	• Downloadable Forms • System Tutorials	Concerned Divisions
10. Job Opportunities	As part of CDC's CSR, to public access to employment opportunities and HR transparency.	• To be linked to Jobs portal and CDC HRIS	CSRPD / HRD

11. Resources	CDC's official reports	• Annual Reports • Corporate Plans	BDBEG / CPD / Compliance Office
12. Transparency and Governance	Performance Scorecard targets vs. accomplishments, validation results, governance scorecard disclosures. Demonstrates organizational performance and compliance with GCG evaluation metrics.	• Governance Structure - Board of Directors, Committees, Governance Manual, Code of Conduct • GCG Compliances - Performance Scorecard, Corporate Operating Budget, Audited Financial Statements, COA Reports, Procurement Plans and Other Transparency Seal contents • FOI Section - FOI Manual, FOI Receiving Officer, FOI Process, FOI Registry • Citizen's Charter - Frontline Services, Processing Time, Fees, Service Standards • GAD Section - GAD Plan and Accomplishment Report • Data Privacy - Privacy Notice, DPO Contact	Legal / Compliance /CPD/ Finance / HR / FOI
13. Bids and Opportunities	Ensures procurement accountability and public disclosure compliance.	• Procurement: Bid Opportunities, Notices of Award, PhilGEPS Link, Procurement Monitoring Reports	BAC Secretariat / PD
14. Contact Us	Contact details, email, hotline,	• Address	ITD / RMD / FOI

	Customer Feedback mechanism.	• Hotline / Email Address • Online Inquiry Form • Feedback and Complaints • Whistleblowing	
15. Investor Portal	Quick links to all investor-related platforms	• OBRA • eBAR • TFD Systems	BDBEG / ITD

Eligibility and Documentary Requirements of the Supplier
*Procurement of Web Development and UX/UI Design Services
for the Enhancement of the CDC Corporate Website*

To establish legal, technical, and financial capability, the supplier shall submit the following documentary requirements:

A. Legal / Eligibility Documents

1. Valid PhilGEPS Certificate of Registration and Membership (Platinum)
2. Valid Mayor's Permit / Business Permit issued by the city or municipality where the principal place of business is located
3. Valid and updated Income Tax Return (ITR) and/or latest filed tax returns as required under applicable procurement rules
4. Omnibus Sworn Statement in accordance with applicable government procurement regulations.
5. An attestation signed by the supplier declaring that:
 - a. The deliverables shall be free from any encumbrances, claims, or restrictions that would prevent full ownership transfer to CDC;
 - b. Upon project completion, the supplier shall transfer full ownership of all deliverables to CDC;
 - c. The supplier shall not embed any proprietary or subscription-based components that would result in vendor lock-in, recurring dependency, or restricted system control without prior written approval from CDC.

B. Technical Qualification Documents

1. Company Profile indicating:

- a. years in operation,
- b. nature of business,
- c. relevant experience in website development, CMS implementation, UI/UX design, systems integration, and government or enterprise web projects

2. List of completed and/or ongoing similar projects

- a. The supplier must submit a list of similar projects related to website development, website enhancement, CMS implementation, web portals, e-governance platforms, or comparable digital systems.
- b. At least one (1) similar completed project must have a contract value of at least fifty percent (50%) of the ABC, or Php 1,000,000.00.
- c. For each project, the supplier shall indicate:
 - i. project title,
 - ii. client / agency / company,
 - iii. contract amount,
 - iv. project duration
- d. Supporting proof such as Certificate of Completion, Certificate of Acceptance, Official Receipt, Sales Invoice, Notice of Award, Purchase Order, or Contract may be required.

3. Project Work Plan / Implementation Schedule

- a. Detailed timeline showing deliverables and milestones within the required four (4)-month delivery period.

4. Personnel Requirements

The supplier shall submit a list of key personnel to be deployed to the project, together with the following:

- a. Curriculum Vitae (CV)
- b. Relevant training, certifications, or portfolio, if applicable
- c. Description of role in the project

At a minimum, the proposed project team must include the following to ensure the timely delivery of the project:

- d. Project Manager / Account Manager
 - i. With experience in managing website development, CMS deployment, or similar ICT projects.
- e. UI/UX Designer / UI/UX Expert
 - i. Must have relevant experience in designing modern, accessible, responsive, and user-centered websites or portals.
 - ii. Should demonstrate capability in:
 - 1. user interface design,
 - 2. user experience planning,
 - 3. responsive design for desktop, tablet, and mobile platforms.
- f. Full Stack Web Developer / Lead Developer
 - i. With experience in **PHP** and **MySQL** development.
- g. Developer/s
 - i. With experience in responsive web design, accessibility implementation, and front-end optimization.
 - ii. With experience in CMS development, user roles and permissions, APIs, integrations, and secure database-driven applications.

The supplier may propose additional personnel as necessary.

Note:

Upon issuance of the Notice of Award (NOA), the Winning Supplier shall submit a Notarized Non-Disclosure Agreement (NDA) to CDC prior to the commencement of any project activity involving access to CDC data, systems, documents, credentials, configurations, or other confidential information.

Upon completion and acceptance of the project, the Winning Supplier shall execute a **Deed of Assignment** in favor of Clark Development Corporation (CDC), transferring full ownership of all project deliverables, including but not limited to:

- Source code (front-end and back-end)
- Content Management System (CMS)
- Website design (UI/UX assets, layouts, prototypes)
- Database structures and schemas
- Documentation, technical manuals, and configurations
- All custom-developed modules, scripts, and integrations

The Deed of Assignment shall ensure that:

- CDC shall have full, exclusive, and perpetual ownership of the system and all related deliverables;
- CDC shall have the right to modify, enhance, maintain, reuse, or transfer the system without restriction;
- The supplier shall retain no ownership rights, except for reusable non-proprietary components explicitly declared;
- No part of the system shall be subject to licensing restrictions that would limit CDC's full use and control.
